Scott Farm Seed Company

Mechanicsburg, Ohio

It's Time to Order Seed

In looking over the farm seeds listed on the inside pages we'd like to call your attention to the many newer or improved varieties and strains as well as the old standbys. We believe that year after year Scotts offer more of the recommended newer seeds than any single source of supply.

Last season Clinton oats and Buffalo and Ranger alfalfa were first quoted. This year it is Kentucky 31 fescue, Ajax, Benton and Eaton oats, and Bay barley. Soon it will be Butler wheat, Hawkeye soybeans, and other new seeds. Listed for a longer period but still in limited supply are Cumberland and Midland clover, Ladino, Birdsfoot Trefoil, Alta fescue, Certified Brome and Reed Canary grass.

Seed Oats, Barley

Treating seed grains each season has been recommended for a long time. Stands are improved and there is less loss from smuts and other diseases. Every bushel sold by Scotts is treated to help insure high production of quality grain. The most highly recommended varieties of both oats and barley are listed and nearly all are ready for immediate shipment.

Clovers, Alfalfa

This is a good year to seed Midland or Cumberland clover. Stands are better and production usually higher because of more disease resistance and greater winter hardiness. Red and Mammoth clover seed production was much less than last season and there may be some increase in later prices. Because of their wilt resistance, Buffalo and Ranger alfalfa are recommended where stands are to be left three years or more. Kansas is winter hardy enough and remains as one of the best varieties for the central alfalfa belt. Alfalfa seed of most origins is in good supply.

Meadow, Pasture Mixtures

Mixtures of legumes and grasses are suggested as some fill in where others may not make a satisfactory stand. There is less winter damage and meadows are more suitable for pasturing after a hay crop has been removed. Only top quality noxious weed free seed is used in all of Scotts meadow and pasture mixtures.

Hybrid Seed Corn, Soybeans

We believe there will be enough seed corn and soybeans for everyone. However, some varieties of corn may become exhausted and substitution necessary or else less desirable grades may need be planted. Soybeans were largely sold by farmers last fall when prices looked high and with the market continuing upward many more have moved to the mills in 1948. Orders will be accepted for later shipment.

TREATED HYBRID SEED CORN

Scotts Hybrid Corn has been graded for width, length and thickness and will plant easily and accurately in any make of planter. It is treated for protection against disease. The round kernels are graded uniformly and will yield just as well as the flats but special plates are usually required for accurate planting. These plate are available for most standard planters.

ROUNDS—Only medium and large rounds are offered. Carefully graded, high in germination, produce strong plants, and will yield as well as flats at a saving in seed cost. The same grades are available each year.

SCOTTS 11—Slightly earlier than Ohio M-15. Large ears for an early hybrid. Has out-yielded Ohio M-15. Sound dark yellow ears. Suited to short season or late planting.

SCOTTS 22—The maturity of Ohio M-20 and M-34. Has outproduced its maturity class on many different farms. Good roots, sound ears, good quality fodder, dries out quickly.

SCOTTS 33—Maturity of K Hybrids. A real producer with disease and smut resistance. Easy husking, nice fodder not as tall as K-24. Will pick clean and crib early.

SCOTTS 66—One of the best medium maturing hybrids in the corn belt. Disease resistant, husks easily, strong roots, high yields on a wide variety of soils.

SCOTTS 60W—A white hybrid, medium sized fodder and ears. A good producer in its maturity class. Strong roots and stalks, good crib corn. Thoroughly tested in the corn belt.

SCOTTS 99—Maturity of U. S. 13. Bred for more corn borer resistance and higher yield than U. S. 13. Dark green color. Can be used for ensilage or crib corn.
